PAPER MACHINE OIL

AMALIE Paper Machine Oil 220 is formulated to perform in the rigorous environment of modern paper machines. Its versatile design allows effective operation for both “Wet” and “Dry” end applications when used for the manual, ring, collar or rolling bearings of the paper machine’s dry end as well as in vacuums, water pumps, blowers, main drive shafts, and re-winders. It provides excellent oil/water separation, anti-wear properties, corrosion protection, oxidation inhibition, filterability, and low foaming tendencies in high temperature, high pressure heavy-duty service. This oil demonstrates outstanding water separation characteristics for the removal of water from gear and bearing systems.
